SUMMARY

Final-year B.Tech Computer Science student with hands-on full-stack development experience (React, Node.js/Express, MongoDB) and applied data analysis skills, backed by strong problem-solving fundamentals (170+ DSA problems solved on LeetCode). Independently designed and built two full-stack web applications end-to-end, including an AI-powered resume analysis tool, and led a 4-member team to a top-7 finish among 50+ teams at a national-level hackathon. Seeking a Full-Stack Developer / Data Analyst internship, including opportunities with the Indian Army's technical internship programs, to apply strong software development, analytical, and problem-solving skills to real-world, mission-critical systems.

KEY EXPERTISE

TECHNICAL SKILLS: **Languages:** Java, JavaScript, HTML, CSS
Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Vite
Tools: Git, GitHub, Postman, VS Code, ImageKit
Databases: MongoDB, MySQL

PROJECTS

Resume Analyzer AI | Personal Full-Stack Project (Solo)

[GitHub](#)

[b](#)

- Built a full-stack AI-powered resume analysis application with a React (Vite) frontend and Node.js/Express backend, with RESTful APIs to parse resume content and evaluate it against role requirements.
- Delivered structured, section-wise feedback through a responsive, component-based UI; independently scoped, developed, and deployed the complete application end-to-end.

Captionly | Personal Full-Stack Project (Solo)

[GitHub](#)

[b](#)

- Architected and independently built a full-stack image-captioning web application end-to-end, designing both the React (Vite) frontend and the Express.js/MongoDB backend.
- Designed and implemented a RESTful API (GET, POST, DELETE) with structured error handling to manage image uploads, captions, and a live MongoDB-backed feed.
- Integrated the ImageKit API for image storage/URL generation and engineered client-side state management (React Hooks) to keep the UI synchronized across upload, feed, and deletion flows.
- Debugged and resolved state-synchronization and routing issues, validating functionality through repeated multi-image upload testing to confirm consistent performance.
- Independently scoped, built, and delivered the complete application within a 1-week timeline.

LEADERSHIP

Team Lead | Dronpratibimb Hackathon

May 2026

- Led a 4-member team to design and build an Indian Sign Language (ISL) Interpreter using Python, React, Tailwind CSS, and MediaPipe, ranking top 7 among 50+ teams; coordinated task delegation, presented to judges, and liaised with mentors throughout.

Team Lead | Smart India Hackathon (SIH), College Round

Aug 2025

- Led a 4-member team through the college-level round of Smart India Hackathon 2025, coordinating task allocation, development timelines, and team communication with faculty mentors.

ACHIEVEMENTS

- DLF Cares Scholarship** — Merit-based scholarship awarded in recognition of academic performance.
- LeetCode** — 170+ Data Structures & Algorithms problems solved.

EDUCATION

Dronacharya College of Engineering

Gurugram,

Haryana, India

Bachelor of Technology – Computer Science Engineering: **8.5/10.0 CGPA**

Expected 2028

Senior Secondary & Secondary Education

Gurugram,

Haryana, India

Grade 12th – Senior Secondary: **88%**

Grade 10th – Secondary: **89.2%**

CERTIFICATIONS & LANGUAGES

- Responsive Web Design | [freeCodeCamp](#)
- Data Structures Using C | [NPTEL](#)
- Data Structures and Algorithm Design | [NPTEL](#)

Languages: English (Fluent), Hindi (Native/Fluent)
